

Super Clean 200

Extremely Fast Drying, High Powered Textile Stain Remover for Fabric, Yarn & More!

PRODUCT SPECIFICATIONS

It also works great in the removal of grease, soils & Oil Stain from heavy fabric. This chemical is designed to cure plastisol stains, flock lettering & Most any type of fabric stain that might appear during screen printing process for best results and for edit safety cleans fabrics on a vacuum exhaust system this will hold the fabric firmly in place and reduce solvents vapours it is nonflammable solvent and used in laundry machines.

Super Kleen 200 is the most powerful cured ink remover manufactured. It is made for all screen print applications. The ultra fast-drying formula removes ink marks quickly and does not spread. This reduces chances of ink bleeding around the cleaned area. A new "frost-reducing" additive eliminates moisture rings caused by condensation. Super Kleen 200 removes cured plastisol ink, water and vinyl based inks, ballpoint and marker pen inks, felt-tip marks, adhesives and more. Unlike other screen print ink removers, Super Kleen 200 does not contain any "filler" petroleum distillates.

- **Light odor**
